

PSHCE To continue our work on No Outsiders we will be reading the book *We're All Wonders*. We will be discussing that everyone has differences and knows what being unique means. Children will learn to understand what a bystander is and how to help. #ResponsibleCitizens

Science This half term the children will complete investigations which will promote the skills of "working like a scientist". We will begin by creating a tornado in a bottle and follow this up by improving our predicting and concluding skills in lots of other experiments.

P.E. We will be creating a dance inspired by some of the extreme weather patterns that we have looked at. Class 7 will continue to go swimming on a weekly basis, building upon the skills they have already learnt. Class 8 will learn a range of invasion games.

RE The children will be learning about Sikhism. We will learn about the teachings of Guru Nanak and his leadership qualities. We will discover the culture of Sikhs by learning about their beliefs, place of worship and the 5 K's.

DT Whilst studying natural disasters, we will disassemble wind socks to understand their construction. The children will then take inspiration from a range of designs to make their very own wind sock!

Computing The children will use the computers to develop a weather report in groups. They will select, and prepare reports by cropping, resizing editing and importing still and moving images into a multimedia presentation. This will eventually lead up to a recording of a weather report on camera using green screen to show images of the weather.

Spanish The children will continue their weekly Spanish lessons with Senora Linfoot. They will progress through Learning about Spain, the numbers to 20 as well as classroom objects and instructions.

Extreme Earth!

Key Question: What makes our earth angry?

Geography - This half term the children will learn all about natural disasters and extreme weather patterns. How are tornados formed? Why do people live near volcanoes? How destructive are earthquakes? All this will help us discover what makes our Earth angry!

Art Children will be taking inspiration from the greats. Firstly, we will focus on the work of Hokusai and 'The Great Wave'. We will use his work to master various brush techniques such as using thick and thin brushes to create our own version of his painting

Music In music, we will be following using our Charanga software to help us learn how to play alockenspiels.
