

11 February 2020

Dear Parents/Carers/Governors,

We will soon be celebrating British Science Week at Archibald (9<sup>th</sup> - 13<sup>th</sup> March). Pupils will carry out a range of hands on and fun activities to help build an even greater passion for science. To further enhance learning, we would like to invite any parents/carers/governors with a STEM background (science, technology, engineering, maths) to come in and share their expertise with our pupils!

In the past we have had dentists, civil engineers, chemical engineers, science teachers, vets, doctors and many more work with a class. Visitors have provided PowerPoints presentations to explain what their job entails or brought in objects and clothing for children to look at and try on. Other visitors have led hands on activities for children and even brought a colleague with them. Any volunteers would be greatly appreciated as our pupils always benefit hugely from these visits and are fascinated by what they learn.

We would welcome volunteers at any time during the academic year as well as British Science Week itself. If you are interested in working with us then please contact your child's class teacher to discuss this further. Any parent, carer or governor who has worked with us previously is more than welcome to do so again!

Thank you for your continued support.

Yours sincerely,

Mr Morrow
